

Reglex

Verifiable answers from *statutes*, *rules*, and the regulatory record.

THE PROBLEM

State agency staff lose hours to **fragmented regulatory sources**. Statutes, rules, fees, and authority sit across dozens of official sites, creating inconsistent compliance and making cross-state analysis impractical.

THE SOLUTION

Reglex consolidates those sources into a *citation-grounded* research assistant. Staff query in plain English, get verified answers with inline source links, and compare regulations across states in seconds.

i. HOW IT WORKS

PIPELINE · INGEST TO ANSWER

01 · Sources

Agency Sites

Crawlers ingest statutes, rules, fees from official sources.

02 · Compress

LLM Extraction

Bedrock distills each doc into structured fields.

03 · Index

Hybrid Store

OpenSearch holds vectors and BM25 side-by-side.

04 · Reason

Agent Router

Intent dispatches to compare, fee, or authority agents.

05 · Answer

Cited Reply

Reflection verifies every citation before delivery.

ii. WHAT IT DOES

01

Hybrid Search

Semantic and keyword retrieval, fused. Find the passage by section number or by gist.

02

Cross-State Compare

Side-by-side licensing, penalty, and authority across jurisdictions in one query.

03

Authority Tracing

Surfaces statutory authority and flags potential *ultra vires* conditions.

04

Cited & Auditable

Inline source links, verification step, full retrieval trail. No claim without an anchor.
